---

## Summary

Web Developer with experience building full-stack web applications using React (TypeScript) on the frontend, and Express (TypeScript) and Fiber (Go) on the backend. Skilled in developing and consuming RESTful APIs, working with Prisma ORM, and integrating Supabase for both database and file storage management. Experienced in managing development environments using Docker and Docker Compose. Applies modular architecture and clean code principles, with strong debugging skills and a quick adaptability to new technologies.

---

## Technical Skill

- Programming language: JavaScript, TypeScript, Go
  - Frontend: React, Tailwind CSS
  - Backend: Express, Fiber
  - Database: PostgreSQL, Supabase
  - Version Control: Git
  - DevOps & Tools : Docker
  - Testing Tools : Postman
- 

## Formal Education

### Padjajaran University

Bachelor of Science in Information Science

GPA: 3.59/4.00

August 2017 - November 2023

### SMAN 11 Bandung

Social science

Juli 2014 - Mei 2017

---

## Non-Formal Education

### Bootcamp Dumbways Indonesia

Fullstack developer

January 2025 - July 2025

- Built full-stack web applications using React and TypeScript on the frontend, and Express and TypeScript on the backend, connected to Supabase databases and file storage management.
- Applied RESTful API principles to ensure seamless frontend-backend integration.
- Practiced collaborative software development using Git, GitHub.
- Gained familiarity with modern development practices, including modular architecture, clean code, and debugging techniques.

### Dicoding Indonesia

Back End Path

September 2024 - October 2024

- Studied the fundamentals of programming and designed basic algorithms using JavaScript.
  - Developed RESTful APIs on the back end and performed testing using Postman.
- 

## Work Experience

Atlet Bridge - GABSI Subang

2021 - 2022

- Competed professionally in regional and national bridge tournaments.
- Developed strategic thinking, problem-solving, quick decision-making, and teamwork under pressure.
- Maintained discipline in practice and demonstrated a strong commitment to personal growth and team performance.

## Related Projects / Portfolio

- Circle App: A social media application that allows users to share text and image posts, follow other users, search for users by name, authenticate via login and registration, and view public user profiles.  
Demo: <https://circle-share.vercel.app>  
Github: <https://github.com/yudha-Dlesmana/circl-UI>
- Cepat Invoice App: An invoice generator that allows users to create professional PDF invoices, view a list of generated invoices, and open invoices for review.  
Link: <https://cepat-invoice.vercel.app/>  
Github: <https://github.com/shofiyatunnisa9/Cepat-Invoice>
- apifaker: mock API tool that allows developers to define custom schemas and instantly generate real-time JSON responses with no setup required. Built for prototyping, frontend development, and testing purposes, enabling faster iteration without relying on a live backend.
